

SQL Project: *Exploring Global Happiness with SQL*

Scenario

You are a data analyst for an international research team. Your task is to use SQL queries on the World Happiness Index 2019 dataset to extract insights and present your findings in a professional PowerPoint deck for policymakers.

Tasks

Phase 1 – Data Familiarisation

1. Query: List all countries and their happiness scores (descending).
➡ PPT Slide: Title “Global Happiness Rankings” with a table or screenshot.
2. Top 10 happiest & bottom 10 countries.
➡ Slide: Two side-by-side charts (Top 10 vs Bottom 10).
3. Count of countries in the dataset.
➡ Slide: “Dataset Overview” (country count, average score, etc.).

Phase 2 – Analytical Queries

4. Average global happiness score.

➡ Slide: Key metric highlighted (maybe a big number visual).

5. Country with the highest GDP per capita vs global average happiness.
➡ Slide: Side-by-side comparison (bar chart).
6. Top 5 countries with the highest social support.
➡ Slide: Horizontal bar chart.
7. Top 5 countries ranked by healthy life expectancy.
➡ Slide: Horizontal bar chart.

Phase 3 – Insights & Correlations

8. Lowest corruption perception countries vs happiness scores.

➡ Slide: Scatterplot or table with commentary.

9. Generosity vs happiness correlation (above vs below average generosity).
➡ Slide: 2-column comparison chart.
10. Countries with the largest difference between GDP rank and happiness rank.
➡ Slide: Highlight outliers in a table or chart.

Phase 4 – Advanced (Stretch)

11. Compare GDP per capita ranking vs happiness ranking.

➡ Slide: Scatterplot with GDP rank vs Happiness rank.

12. Categorise into High/Medium/Low happiness groups.

➡ Slide: Pie chart showing distribution.

13. Top 5 countries with high social support & freedom.

➡ Slide: Venn diagram style visual or 2D scatter chart.

Final Deliverables in PPT

- Cover Slide: Title, your name, course name.
- Dataset Overview: Country count, variables.
- SQL Insights Slides: Each query result visualised.
- Key Findings: 3–4 bullet points on insights.
- Conclusion Slide: Recommendations for policymakers.
